

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over thirty years has borne the signature of *Dr. J. C. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that end in danger and danger to the health of infants and children. Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea, alleviating all disorders arising from indigestion and by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep. *Dr. J. C. Fletcher's Panacea—The Mother's Friend.*

CASTORIA ALWAYS

Bears the Signature of

Dr. J. C. Fletcher

In Use For Over 30 Years

The Kind You Have Always Bought

BRIEF STATE NEWS

Providence—The first of the new houses built by the city of Providence, designed by the architect, John H. Fox, and built by the city, is now being occupied by the city. The house is a two-story building, with a front porch, and is located on the corner of the city. The house is a fine example of modern architecture, and is well equipped with all the latest conveniences. The city is proud of this new addition to its housing stock, and hopes that it will serve as a model for other city housing projects.

MARKED INCREASE IN BUILDING ACTIVITIES

Within the past few weeks the building activities in the city and vicinity have increased to a marked degree and contractors are beginning to resume pre-war business. Within a few months it is expected that long delayed buildings will be put up which were stopped by the government.

The largest building project so far is the new garage for William F. Bailey, plans for which have just been completed by Architects Cudworth & Thompson. The garage will be located on the site where Mr. Bailey's livery stable is at present and will be one of the largest and best located in the city. The garage is 50 by 80 feet and one story high. The walls are to be of brick and the roof is to be of tar and gravel. The outstanding feature of the building is that there will be only two posts on the interior of the building and will be so located as not to interfere with the moving of cars. This fact is due to the truss roof which will be erected, thereby eliminating several pillars which are a nuisance in a garage. Besides the garage and repair department, there will be a show room which will accommodate two cars. The floors are to be of plank and the basement will be left so that this can be utilized if necessary. There will be two large doors and the front of the building will be done in plate glass. The approach to the garage is to be graded so as to be easy of access and in the rear it is planned to erect an addition. The cost of the new structure will be several thousand dollars.

The Koscisko Pataki Corporation are planning to erect a two story brick building on their property in the close proximity of their present building, on North Main street. The building is to be of reinforced concrete poured in molds. The building is to be 50 feet by 30 feet and the lower floor will be occupied by a garage and store. The application has been filed with Fire Marshal Howard L. Stanton.

Contractor William H. McQuirk has filed a building application with Fire Marshal Stanton for permission to alter an old building at 23 Division street into a two story frame building. The proposed structure is to be 13 by 24 feet, the first story to be used as a garage and the second story for storage purposes. It will be of stone, brick and wood, with shingled sides and non-combustible roof.

In Preston Contractor P. J. Sweeney is erecting a six room cottage for Clarence Stokes. The exterior finish is in shingled roof and clapboard sides. The work has progressed rapidly and the building is now ready for plastering. The basement floor and trim have been finished.

Work has been started on a garage in Farmington for Frank Claudon and work is progressing rapidly. The structure is to be two stories high with cement floor and stucco finish. The dimensions are 45 by 45 feet. Contractor Sweeney has the contract. Lyman Zierler has filed a building application with Fire Marshal Howard L. Stanton for permission to erect a

shed at 57 Maple street. It is to be 10x30 feet, one story high and the wood used will be white pine and spruce.

Casey R. Spersky of Groton and Norwich is to erect a two story building at the rear of 23 Thames street. It will be of frame construction 16x25 feet and will be used at present for storage purposes. The wood used will be spruce and white pine. An application for permission to build has been filed at the office of the fire marshal.

A barn will be erected on Elizabeth street for Joseph Sacks and will be of white pine and spruce. It is of frame construction and is 16 by 23 feet and 14 feet high. A building application has been filed.

Giovani Nostanacchi has filed application for permission to erect a two-story house near 300 Essex avenue and work is to be started within a short time. The building will be of frame construction with shingle roof and clapboard siding. The floor will be of pine.

The work on the alteration of the Moberg store which has been done by Peck-McWilliams company is practically complete with the exception of painting. A new department has been installed and several of the other departments have been changed. A large refrigerator has been installed and the installation of this necessitated the erecting of an addition 12x12.

CONNECTICUT COLLEGE

DORMITORY. Architects are preparing plans for the new dormitory to be erected at Connecticut College for Women, to be ready for occupancy next September. The building is to be of the same Blenheim type as Plant house and Blackstone house and will extend to the north 20 or 30 feet, on the line with Plant house.

Plant and Blackstone, though varied in detail, are practically identical in plan. Each of the buildings is designed to furnish individual rooms for 25 students, each room having an area of approximately 10 to 14 feet, casement windows opening to the sun, a closet, electric lighting, hot and cold water, and steam heating. On each floor there is a bath room with ample provision of tubs and showers.

The main floor has a suite provided for the resident fellow, or head of the house, quarters for the resident maid and a room for meetings of the students and the reception of visitors.

It is quite probable that the new dormitory will be several yards longer than Plant and Blackstone, if the college authorities are able to obtain permission from the city to close the head of Reservoir street.

NEW LONDON.

Architects are preparing plans for the new building to be erected on the grounds of the Lawrence Hospital, between Montauk and Ocean av., for the Lawrence and Memorial Hospitals. The new building will be 44,500 feet, two stories high, with plate glass front in copper setting. The arrangement of the second floor has not been decided and the third floor will be devoted to an assembly hall. The building will be heated by steam and all the usual conveniences will be included.

Bilderbeck & Langdon, Inc., are preparing plans for a garage to be built on Main st. for M. A. Avery. The building is to be 30x100 feet, two stories high, of reinforced concrete and brick and tile walls. It is a precast construction, steel sash, gravel roof and concrete floor. A show room will be fitted up, with plate glass windows, and the building will be heated by steam or a vapor system.

From the plans of Architect Dudley S. C. Kempton estimates are being made on a cottage to be built on Ocean av. for Harold G. Pond. It will be of wood, with eight rooms and two baths. All the conveniences will be provided, including steam or hot water heat. The cost will be about \$3,000.

Plans have been made by Bilderbeck & Langdon, Inc., for remodeling the Arnold Rudd building on Bank st. for the Schwartz Furniture Co. The front of the first story is to be brought out to the sidewalk line, with new plate glass windows and other changes.

Architects are submitting plans in competition for the new church which the Methodist Episcopal Society will build on Broad st., near Huntington, at a cost of \$75,000. The building committee consists of A. T. Miner, Harry R. Tisdale and S. E. Bittner.

J. Taylor Douglas, Inc., is making extensive improvements to the store of Chas. R. Stoll on Bank st. A new floor is to be put in, the front remodeled, with metal ceilings, etc.

Dominick Scarcella has the contract to build a house on Jefferson av. for Rosario Librizzi. It will be of wood, 22x22 feet, costing \$2,000.

Work has been started by C. D. Harte & Langdon, Inc., for building on Ocean av. for Louise K. Pettigrew. It will be 26x23 feet, of wood, with seven rooms, and costing \$3,500.

J. A. St. Germain is remodeling

a house on Montauk av. for Mrs. C. A. Sackett. J. H. Newman is doing the plumbing.

Contractor J. A. St. Germain is completing the house which he has been building for himself on Wilbur av. and will have it ready for the market in a week or two. H. J. Kennedy is doing the plumbing and heating.

Building Permits. Dr. Thos. J. Murray, veranda, Huntington st. Cost \$500.

Charles R. Stoll, alterations, Bank st. Cost \$2,000.

A. Guilford, addition and garage, Walpole st. Cost \$1,000.

Rosario Librizzi, frame house, Jefferson av. Cost \$2,000.

Sam Antis, brick building, Bank st. Cost \$1,500.

R. Binkless, frame balcony, Lincoln av. Cost \$150.

F. H. Davis & Co., addition, 125 Bank st. Cost \$200.

Louise K. Pettigrew, frame house, Ocean av. Cost \$3,500.

GROTON. J. Taylor Douglas, Inc., has started work on an addition to the plant of the Ship & Engine Co. in Groton. It will be 50x72 feet, of wood, stuccoed, one story high, with gravel roof, and will be used for storage purposes.

ROCKVILLE. Work is to be started about April 1 on a permanent building to be known as the Rockville City Hospital. The plans call for the remodeling of the building on the Gaynor place on Prospect street. The frame of the large dwelling house now standing on this property is to be used, and the structure will be changed into an hospital, at an approximate cost of \$20,000. The building will remain two stories in height, with two large wards on the first floor, one for men, and the other for women. An office, dining room, kitchen and operating room will be on the first floor. On the second floor will be several private rooms and a maternity ward.

The repairs planned are to be completed so that the building may be used about November 1.

STATE BUILDING AND BUSINESS. Bank clearings for the week show gains of 11.1 per cent. in Hartford and 7.3 per cent. in Springfield, with a decrease in New Haven of 7.3 per cent. and a loss in Waterbury of 18 per cent.

Real estate transactions throughout Connecticut continue at top notch in volume. During the past week in the towns reported in The Commercial Record, there were 433 sales by warranty deed, with mortgages loans amounting to \$1,690,255, compared with 273 sales in the like week of the previous year, with mortgage loans of \$594,370. The large increase in the loans is accounted for by the fact that the old Shureco Quarry property in Banford was covered by a big blanket mortgage.

The record of petitions in bankruptcy filed in Connecticut during the week shows total liabilities for the five bankruptcies of \$10,670, and assets of \$11,157. Last year during the last week of March there were 12 bankruptcies reported, with liabilities of \$146,288 and assets of \$119,727, and in 1917 five bankruptcies with liabilities of \$24,613 and assets of \$41,108.

Ten new incorporations are reported for the past week, with authorized capitalization of \$873,000. These figures compare with eight companies a year ago for the same week, with capital of \$235,000, and 15 companies in 1917, with capital of \$895,000.

The trend of the building operations is still upward. During the week 152 permits were issued in the leading Connecticut cities, for buildings costing \$310,662, against 102 permits in the corresponding week of 1918, for buildings costing \$252,000, and 159 permits in 1917, at a cost of

A CLEAN SCALP

Parian Sage Quickly Stops All Itching and Prevents Dandruff.

Almost everybody nowadays knows that Parian Sage, the invigorating hair restorer, is guaranteed to remove every trace of dandruff, stop falling hair and keep the scalp cool, moist, small as it is, will be refunded.

But you should know more about this hair restorer. It is guaranteed to remove all dandruff that is bound to come from the scalp and the dandruff in 10 minutes after an application, your head will feel cool and comfortable.

Everyone should have a bottle of Parian Sage handy because it is such a pleasant and exhilarating hair treatment. Ladies use it because they know it is delicately perfumed, not sticky or greasy, and surely does make the hair beautiful, silky and abundant. Here's what a New York woman writes: "I have used Parian Sage for two years and only, yet in that time find my hair has wonderfully increased in beauty, thickness and luxuriance. And what surprised me most was the disappearance of all dandruff."

A large bottle of Parian Sage can be obtained from Lee & Osgood or at any good drug or toilet counter—it's not expensive.

DETAILS OF DISAPPEARANCE OF BURGOMASTER OF DUSSELDORF.

Berlin, Sunday, March 30.—(By the A. P.)—Details of the heretofore mysterious disappearance of Adalbert Oehler, chief burgomaster of Dusseldorf, who vanished during the last Spartacist uprising there and has not been seen since, are published by the Vossische Zeitung. Oehler fled across the Rhine to the occupied district, the paper says, and has remained there although his return has been urged strongly by the citizens of Dusseldorf, who want to have the legal status of his case cleared up.

The paper also claims that the provincial governor of that district, Dr. Jansen, fled across the Rhine, but has returned. He was exonerated and released from the postoffice. Mendon was among the leaders in this county during the war in matters requiring patriotism, filling its quota early in Liberty loans.

NO CHANGE IN CLOCKS AT MENDON, ILLINOIS

Quincy, Ills., March 31.—The chamber of commerce of Mendon, Ills., near here, met yesterday and voted that the year being over, clocks of the village should remain as they were before Sunday. The only clocks to be changed were those in the railroad station and the postoffice. Mendon was among the leaders in this county during the war in matters requiring patriotism, filling its quota early in Liberty loans.

How One Woman

Saved a Big Paint Bill

The living room woodwork was dingy. Her husband thought it needed repainting. But with wisely care for the family purse, she thought she would try Fels-Naptha Soap (as suggested on the wrapper) before going to a painter to have the job done.

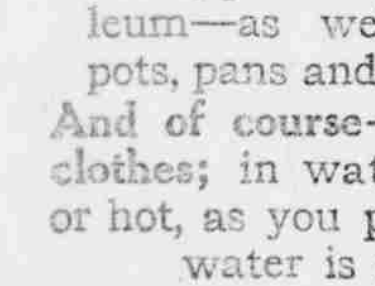

And what a surprise followed! The white paint stood out like new. The naptha dissolved the surface dirt which came off at once.

On that woodwork that you think requires painting or refinishing, try Fels-Naptha Soap! Use it for every soap-and-water-purpose around the house—for closets, floors, porcelain bath tubs, linoleum—as well as on greasy pots, pans and dishes.

And of course—always use it for clothes; in water, cool, lukewarm or hot, as you prefer—although hot water is not necessary.
